

IMPORTANT EPA NOTICE!

If you work on homes built before 1978...

New regulations governing the safe removal and work around a lead based environment require individuals, who may disturb painted surfaces become EPA Certified Renovators. The Certified Renovator Class is a 1 day course about "Lead Safe Work Practices" on the job. The rule covers various categories and affects millions of jobs including but not limited to:

Remodelers, Plumbers, Electricians, Painters, Handymen, workers who do Carpet and Floor Covering, Window Replacement, HVAC, and Siding.

Each individual MUST become a an EPA Certified Renovator. If in the past, you took the Ohio Safe Rennovator course, you are NOT an EPA Certified Renovator until you take the EPA refresher class. In addition, if you carry a *Lead Abatement contractor or Lead Abatement worker license*, you must **STILL become an EPA Certified Renovator.**

Certification Is Mandatory! "Firm certification is not the same as personal certification." This law requires both company and individual be certified by the EPA, any time money is being exchanged with a consumer.

NOTE: This new Law becomes effective April 2010. There will be **no exceptions** - per the EPA. Heavy fines will be levied by the EPA for companies and individuals who have failed to become certified.

EPA- Certification Classes begin January 22, 2010

Each class limited to 18 participants. SUPPLIES & MATERIALS NEEDED FOR CERTIFICATION are provided. -Includes CATERED LUNCH AND REFRESHMENTS. HBA members:\$190.00 per participant, \$250.00 for non-members. Payment is required with registration and is non-refundable. Check or CC accepted. Please complete attached registration form. **For reservations: 330.869.6800**
